**Expense Management Software Market Definition** 

Description

Expense management software refers to a specialized digital tool or platform designed to streamline and automate the process of tracking, submitting, approving, and reimbursing business expenses incurred by employees. This software helps organizations manage costs more efficiently, reduce paperwork, ensure compliance with company policies and regulations, and gain visibility into spending patterns.

Tables & Figures

The main types of expense management software are personal computer (PC) terminal and mobile terminal. PC terminal refers to expense management software designed to be accessed and used primarily on personal computers or laptops. The verticals include banking, financial services, and insurance, information technology (IT) and telecommunications, retail and e-commerce, transportation and logistics, manufacturing, government and public sector, and energy and utilities and are used by various end users, such as small businesses, midsized businesses, and large enterprises.

at a compound annual growth rate (CAGR) of 12.7%. The growth in the historic period can be attributed to automation demand, regulatory compliance requirements, integration capabilities, mobile accessibility. **Expense Management Software Market Growth Forecast** 

The expense management software market size is expected to see rapid

growth in the next few years. It will grow to \$10.82 billion in 2028 at a compound annual growth rate (CAGR) of 13.1%. The growth in the forecast period can be attributed to advanced analytics and AI, enhanced user experience, security and compliance, real-time reporting and decision-making, globalization and localization. Major trends in the forecast period include increased adoption of cloud-based solutions, focus on data security and compliance, Al-powered automation, integration with financial ecosystems, and mobile-centric solutions.

Expense Management Software Market Driver: The Surge Of Remote Work Fuels Growth In The

Book your 30 minutes free consultation with our research experts

**Contact Us** 

**Expense Management Software Market** The rise of remote work is expected to propel the growth of the expense management software market going forward. Remote work refers to the shift in organizational norms and practices that enable employees to perform job duties outside a traditional

office setting, often from homes or other remote locations. The demand for remote work is increasing due to the desire for

improved work-life balance, cost savings for employers and employees, and technological advancements that enable seamless remote collaboration. Expense management software facilitates seamless tracking and reimbursement of remote work expenses, ensuring efficient financial management from any location. For instance, according to the World Economic Forum, a Switzerland-based non-governmental organization, the number of students enrolled in online education surged from 71 million in 2020 to 92 million in 2021. Therefore, the rise of remote work is driving the growth of the expense management software market. Global Expense Management Software Market Major Players

Major companies operating in the expense management software market are International Business Machines Corporation,

Oracle Corporation, SAP SE, Sodexo S.A., Webexpenses Pty Ltd., Intuit Inc., Workday Inc., Insperity Inc., Infor Inc., Sage Group

Plc, Zoho Corporation Pvt. Ltd., Xero Limited, Coupa Software Inc., Payhawk Ltd., The Access Group, Emburse Inc., Expensify

Inc., Koch Industries Inc., Chrome River Technologies Inc., Fyle Technologies Pvt. Ltd., SutiSoft Inc., Abacus Labs Inc., VA Tech Ventures Pvt. Ltd., ITILITE Technologies Private Limited, Receipt Bank Limited Global Expense Management Software Market Trend: Enhancement In Expense Management With Development Of Unified Travel And Expense Solutions Major companies operating in the expense management software market are increasing their focus on developing advanced

solutions, such as a unified travel-and-expense suite, to gain a competitive edge in the market. A unified travel-and-expense

suite is an integrated software solution combining functionalities for managing travel bookings and expense reporting on a single platform. This integration in the expense management software simplifies processes, reduces manual tasks, ensures policy compliance, provides better visibility into spending, and enhances overall control over corporate expenditures. For instance, in February 2022, Coupa, a US-based technology platform for business spend management (BSM), launched a unified travel-and-expense suite to expand its business spend management (BSM). This new package combines easy travel booking, streamlined expense management, a complete mobile app, and live traveler support. It's designed to help companies maximize their travel budget by simplifying corporate travel and expenses. **Expense Management Software Market Merger And Acquisition:** 

Medius Acquires Expensya To Strengthening Capabilities In Employee Spend Management

Indonesia, Japan, Russia, South Korea, UK, USA, Canada, Italy, Spain.

market includes related services sold by the creators of the goods.

**Report Attribute** 

Market Size Value In 2024

In July 2023, Medius, a Sweden-based accounts payable automation company, acquired Expensya for an undisclosed amount. With this acquisition, Medius will expand its product portfolio of powerful AI-enabled, mobile-first employee spend management

and strengthen its position in the French market. Expensya is a France-based software company that provides expense management software. Regional Outlook For The Global Expense Management Software Market

North America was the largest region in the expense management software market in 2023. Asia-Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the expense management software market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

The expense management software market consists of revenues earned by entities by providing services such as expense tracking, approval workflows, reporting, and analytics. The market value includes the value of related goods sold by the service provider or included within the service offering. The expense management software market also includes sales of expense tracking software, reimbursement software, and budgeting and forecasting software. Values in this market are 'factory gate' values, that is, the value of goods sold by the manufacturers or creators of the goods, whether to other entities (including

The countries covered in the expense management software market report are Australia, Brazil, China, France, Germany, India,

The market value is defined as the revenues that enterprises gain from the sale of goods and/or services within the specified market and geography through sales, grants, or donations in terms of the currency (in USD, unless otherwise specified).

downstream manufacturers, wholesalers, distributors, and retailers) or directly to end customers. The value of goods in this

The revenues for a specified geography are consumption values that are revenues generated by organizations in the specified geography within the market, irrespective of where they are produced. It does not include revenues from resales along the supply chain, either further along the supply chain or as part of other products.
